Contents

Foreword vii

Image contrast in high-resolution electron microscopy of biological macromolecules: TMV in ice
R. Henderson 1

Electron cryomicroscopy of frozen-hydrated biological specimens: analysis of freezing artifacts by X-ray cryocrystallography
J. Lepault, J.-L. Ranck and I. Erk 19

Desired features of a cryoelectron microscope for the electron crystallography of biological material
F. Zemlin 25

Specimen flatness of thin crystalline arrays: influence of the substrate
R.M. Glaeser 33

2D crystallization: from art to science
B.K. Jap, M. Zulauf, T. Scheybani, A. Hefti, W. Baumeister, U. Aebi and A. Engel 45

Has negative staining still a place in biomacromolecular electron microscopy?
A. Bremer, C. Henn, A. Engel, W. Baumeister and U. Aebi 85

Metal decoration of biomacromolecules and molecular assemblies: a review
S. Weinkauf and L. Bachmann 113

Site-specific cluster labels
J.F. Hainfeld 135

A brief look at imaging and contrast transfer
R.H. Wade 145

Image restoration for biological objects using external TEM control and electronic image recording
D. Typke, R. Hegerl and J. Kleinz 157

Magnification mismatches between micrographs: corrective procedures and implications for structural analysis
A. Aldroubi, B.L. Trus, M. Unser, F.P. Booy and A.C. Steven 175

Overview of computer-aided electron microscopy
K.H. Downing, A.J. Koster and D. Typke 189

Automatic focus correction for spot-scan imaging of tilted specimens
K.H. Downing 199

Automated microscopy for electron tomography
A.J. Koster, H. Chen, J.W. Sedat and D.A. Agard 207

Computer-controlled spot-scan imaging of crotoxin complex crystals with 400 keV electrons at near-atomic resolution
J. Brink, W. Chiu and M. Dougherty 229

Three-dimensional reconstruction of single particles negatively stained or in vitreous ice
J. Frank and M. Radermacher 241

Processing images of helical structures: a new twist
D.G. Morgan and D. DeRosier 263

From lattice distortion to molecular distortion: characterising and exploiting crystal deformation
W.O. Saxton, R. Dürr and W. Baumeister 287

Correlation functions revisited
M. van Heel, M. Schatz and E. Orlova 307

Factors influencing the precision of quantitative scanning transmission electron microscopy
S.A. Müller, K.N. Goldie, R. Bürki, R. Häring and A. Engel 317

Combination of EELS modes and electron spectroscopic imaging and diffraction in an energy-filtering electron microscope
L. Reimer, I. Fromm, P. Hirsch, U. Plate and R. Rennekamp 335

Quantitative energy-filtered electron microscopy of biological molecules in ice
J.P. Langmore and M.F. Smith 349

Quantitative scanning tunneling microscopy and scanning force microscopy of organic materials
H.-J. Butt, R. Guckenberger and J.P. Rabe 375

Performance of a low-noise CCD camera adapted to a transmission electron microscope
S. Kujawa and D. Krahl 395

The photographic emulsion as analog recorder for electrons
E. Zeitler 405

A brief survey of software packages for image processing in biological electron microscopy
R. Hegerl 417

Author index 425

Subject index 427
